

GAYATRI GOPALAKRISHNAN

Senior Product Manager - Technical | Accessibility, Inclusive UX & Customer-Facing Devices
Seattle, WA • (206) 397-7356 • gaya3g@uw.edu • linkedin.com/in/gayatri-gopalakrishnan

SUMMARY

Product Manager-Technical with 6+ years across product and engineering, focused on accessibility, inclusive UX, and customer-facing device experiences across large-scale UI systems. Led WCAG 2.1 AA compliance across 50+ core UI components for 1,000+ enterprise customers, co-founded an accessibility support board, and drove accessibility standards, roadmaps, feature delivery, QA prioritization, and cross-functional programs across web, mobile, and Kindle surfaces, with hands-on experience in ARIA, keyboard navigation, and screen reader compatibility.

EDUCATION

MBA, Management Science (STEM) | University of Washington, Foster School of Business | Seattle, WA Jun 2026
Foster Forte & Dean's Merit Scholar | VP, Tech Club & Women In Business Club | Foster Case Competition Finalist

Post Graduate Program in AI & ML (GenAI, Agentic AI, NLP, Deep Learning) | Purdue / IBM Aug 2024
Specialized in AI workflow orchestration, LLM-based product development, and production AI deployment

B.Tech, Computer Science & Engineering | College of Engineering, Trivandrum - Rank 2, University Top 1% (10,000+) Jun 2019

EXPERIENCE

Senior Product Manager - Technical (MBA Intern) | Amazon | Seattle, WA Jun - Sep 2025
Worldwide Books Organization - Customer-Facing Content Discovery & Sampling across Web, Mobile & Kindle Surfaces

- Defined product vision, UX strategy, multi-phase roadmap for Amazon's customer-facing Book Sampling experience across web, mobile, and Kindle surfaces. Uncovered a **\$2.5B opportunity** through customer insights and market analysis, translated ambiguous needs into product specs and accessibility-aware design considerations, and secured **VP-level adoption with \$900K development commitment**.
- Authored PRFAQ, business case, and product requirements for an **AI-powered sampling model**. Partnered across **Kindle, Core Store, UX, Legal, GenAI Reading & Discovery, Author & Publishing, and engineering** to align customer needs, responsible launch requirements, technical tradeoffs, and feature priorities. Designed scalable ingestion workflows for author-uploaded and AI-generated samples, reducing manual effort by **500x** and enabling a projected **\$1.7B+ revenue opportunity**.
- Built a production **SQL analytics dashboard** consolidating engagement, conversion, sample usage, and reading behavior across devices and genres. Enabled A/B testing, adoption tracking, customer behavior analysis, ROI measurement, and roadmap prioritization.

Software Engineer 1 to Software Engineer 2 & Tech Lead | ServiceNow Jul 2019 - Aug 2024
Core SaaS Platform | API and UI components used by 1,000+ enterprise customers across ITSM, CSM, and HRSD

Product & Tech Lead (2021 - 2024)

- Led WCAG 2.1 AA compliance across **50+ customer-facing UI components**, defining accessibility requirements, shipping accessible interfaces, and raising internal a11y standards for workflows used by **1,000+ enterprise customers**. Earned company-wide **Q1 2024 Llama Award** and Microsoft VP recognition for accessibility improvements.
- Co-founded the **Now Accessibility Support Board**, advising engineering teams on accessibility requirements, issue prioritization, and reusable UI component standards across platform-wide workflows.
- Owned roadmap and feature delivery for platform UI components, prioritizing accessibility and customer-impact improvements. Resolved **320+ accessibility, usability and quality defects in 2.5 months**, exceeding target by **60%**, and mentored **4 engineers**, with **3 promoted**.
- Served as primary owner for **TinyMCE third-party editor integration**, coordinating with external vendor team to align editor behavior with company accessibility standards. Defined API contracts, keyboard navigation, ARIA usage, and screen reader compatibility requirements.
- Co-led **Activity Stream reengineering**, a real-time interaction component embedded across ServiceNow workspaces. Drove scoping, architecture reviews and execution, improving latency by **35%**, increasing test coverage by **88%**, and reducing regression defects by **40%**.

Software Engineer (2019 - 2021)

- Won ServiceNow Global Innovation Hackathon** for designing and implementing a prototype for editable Activity Stream entries with tag-based grouping, later integrated into production, contributing to **20+ enterprise deals worth over \$750K**.
- Expanded automated unit and functional test coverage by **88%** across platform UI components and advanced **WCAG accessibility compliance**, reducing regression risk while improving live-site quality, accessibility standards, and reliability for enterprise customers globally.

CONSULTING & PROJECTS

AI Product Strategy & Launch Consultant | Space Needle & Chihuly Garden and Glass | Seattle 2024 - 2025

- Designed and launched an **AI-powered workforce management product** integrated with third-party HR systems via APIs. Led execution from requirements definition and integration architecture through engineering delivery and production deployment.

MBA Consultant - Microsoft Copilot Phase 2 GTM | Microsoft | Redmond, WA Jan 2025

- Developed Phase 2 GTM and adoption framework for Microsoft Copilot enterprise rollout, defining launch priorities, adoption metrics, and change-management recommendations.

SKILLS & TOOLS

Accessibility: WCAG 2.1 AA, Accessibility Requirements, Accessibility Standards, Accessible UI, Inclusive UX, Keyboard Navigation, ARIA, Screen Reader Compatibility (JAWS, NVDA, VoiceOver), Assistive Technology Compatibility

Product: PRFAQ / Working Backwards, Roadmap Strategy, Feature Delivery, Technical Tradeoffs, Executive Narratives, Cross-Functional Alignment, Customer-First Prioritization, GTM & Adoption, OKR/KPI Definition, A/B Testing, Customer Behavior Analysis

Data & Analytics: SQL (Production-Level), Tableau, QuickSight, Google Analytics, R Studio, Multi-Source Data Integration, ROI Measurement

Technical: Full-Stack Development, API Design, Third party Integrations, SaaS Platforms, Cloud Architecture, Agile/Scrum, Jira, Figma, GitHub
